O.K., we are going to go ahead and get started. I am so happy to see each of you here tonight, and want to thank you for coming! We are going to have some fun for the next hour as (NAME OF OTHER PRESENTER) and myself share something that has completely changed our lives, and blessed the lives of thousands of others! You are definitely going to want to take notes, so get out your pen and paper.

Essential Oils, and it's my pleasure to welcome you here to (HOST/ESS)'s home to learn about some products that have helped helped countless people enjoy a higher level of fitness. Before we get started, I want to share some facts about declining fitness levels and obesity and its role in the deteriorating health of the average American. According to the World Health Organization, 60-85% of the population worldwide does not get enough physical activity. We know this is especially true in America where the "conveniences" of modern society including cars have made it possible to engage in very little physical activity on a day-to-day basis.

A sedentary lifestyle is associated with a greater risk of many diseases such as depression, anxiety, obesity, heart disease, diabetes, and even cancer! More than 2/3 of adult Americans are overweight or obese. And the number of obese adults in America has doubled since 1980!

Whether we get out and go on a walk daily, practice yoga, play sports, or go to the gym for weight training, it's absolutely CRUCIAL to our health that we do

something to get off our behinds and MOVE!

As much as we know we need to exercise, sometimes it can be hard to find the energy and motivation. How many here can relate to that (*raise hand*)?

Also, there are plenty of supplements out there marketed to help with fitness, but are actually damaging to the health. Studies have shown that many products marketed for fitness are associated with an increased rate of heart attacks, organ failure, and strokes!

If you could find a way to increase your energy levels using non-toxic substances that are safe, natural and health-promoting, and use these same substances to help you on your path to fitness, would you at least want to give it a *try*? (*raise hand*) Would you like to also find a way to save money while using these natural solutions? (*raise hand*).

Young Living is a 24-year-old, billion dollar company that has been founded on the principle that nature has powerful, natural substances from PLANTS to meet the needs of the 21st Century family! Young Living owns and runs hundreds of acres of sustainable, organic farmland and essential oil distilleries in Utah, Idaho, Canada, France, Ecuador, Croatia, and Oman! Young Living is currently doing business in almost *every nation* around the globe, and is rated the *fastest growing* direct sales company in the U.S. with about 100,000 joining each month in the U.S. alone! Our company was founded by Gary Young, who has invested over 35 years in the research and development of essential oils. Together with his wife and company CEO Mary Young, he is continually blazing new and exciting trails all over the world to promote the ongoing success and development of Young Living.

The products we are focusing on tonight are pure, therapeutic-grade essential oils and products enhanced with them. Has anyone ever heard of essential oils before? (*raise hand*) Great! For those who aren't quite sure, essential oils are the lifeblood of aromatic plants. Have you ever broken open the leaf or stem of a plant and seen a fluid come out? (*raise hand*) Well, when you take the precious fluid from aromatic plants containing the plant's therapeutic properties and you super-concentrate it, what you end up with is an essential oil! Young Living is the largest

worldwide distributor of therapeutic-grade essential oils, and has a reputation of providing some of the most pure and powerful essential oils available!

What can essential oils do for you and me? As you're about to see, they do a LOT more than just smell good!

There are 3 ways to harness the power of essential oils, and you will get to experience each of these tonight! First, essential oils can have a powerful impact when inhaled. Second, essential oils can be applied to the skin, either straight (or "neat") or diluted in a carrier oil like olive oil. Third, Young Living has a line of essential oils labeled for internal use called the Vitality Essential Oil line. These essential oils can be used internally either by adding a few drops to our recipes or putting a drop in a glass of water or in capsules. Essential oils are in almost every Young Living supplement we'll be talking about today, and they help enhance the flavor, aroma, and potency. Essential oils help to carry oxygen and nutrients through our cell membranes and may help enhance health at the cellular level.

(If there are 2 presenters, the second presenter should take over here after the first presenter introduces him/her.)

(First Presenter) I'm going to go ahead and turn the time over to _(NAME OF OTHER PRESENTER)_, a _(RANK)_ with Young Living. _____ is not only a great friend of mine, and not only has s/he seen tremendous results with what s/he is going to share tonight, but much more importantly, s/he has also been able to help countless others as well! *(You might add a few additional words of edification.)*

(Second Presenter) Thanks, _(NAME OF FIRST PRESENTER)_, for that introduction! It's a pleasure to work with you and I appreciate . . . *(edify the first presenter here.)*

[NOTE: You should display each of the products discussed in this script if you have them, and then either hold them up or pass them around as you discuss them.]

As I already mentioned, one of the first things that gets in the way of people working out and exercising is feeling lethargic and drained of energy to begin with. It can be hard to peel ourselves off the sofa to engage in any kind of strenuous activity when we're already exhausted!

Energy drinks and sodas from the convenience store as well as sugary foods might give you energy in the short-run, but in the long-term they will only make the fatigue worse. What we need is **energy** that is sustainable and nourishing to the body and will contribute to our long-term goal of greater fitness. These types of products are in short supply in your neighborhood fitness supplement store as well as your local grocery store!

Thankfully, Young Living has several products that fit the bill, and are perfect as nourishing, energizing **pre-workout aids**. They are also so delicious that you won't miss any of the junk you might be used to!

For a major energy burst, take Young Living's NingXia Nitro (*hold up a tube of NingXia Nitro*) prior to your workout! Drinking a serving of NingXia Nitro gives you a shot of energy, alertness, and improved physical performance! It contains naturally occurring caffeine from green tea and Bioenergy D-ribose, as well as Korean ginseng. It contains a lot of other delicious and nutritious ingredients as well including several essential oils, and includes energy-enhancing B vitamins! It's an energy shot you can feel good about!

You can also drink a delicious, energy-enhancing NingXia Zyng that will provide a boost of energy and hydration with only 35 calories (*hold up a can of NingXia Zyng*). NingXia Zyng is carbonated, and its energy comes from naturally occurring caffeine from white tea. It is sweetened with pear juice, cane juice, and stevia and has no artificial sweeteners, flavors, or colors and is pleasantly carbonated. It comes in a lined can so no aluminum will leach into it. It is also enhanced with lime and black pepper essential oils! Drink NingXia Zyng before a workout or whenever you need an extra boost and some hydrating energy.

You can make a delicious NingXia cocktail by adding a tube of NingXia Nitro to a can of NingXia Zyng served over ice! Add in a drop of Peppermint Vitality oil or

Citrus Vitality oils such as Lemon Vitality, Citrus Fresh Vitality, Tangerine Vitality, or Orange Vitality. Also, the aroma of peppermint oil is very stimulating and may help support stamina in exercise. Inhale out of the bottle or apply a drop or two to your chest to get an extra boost as you start your workout!

Some other essential oils to use before your workout are En-R-Gee and PanAway. En-R-Gee oil is ideal to inhale or wear on a diffuser necklace before and during your workout. Its stimulating aroma helps you keep moving and motivated to push through to the end of your workout. *(pass around En-R-Gee)*

You can also dilute PanAway essential oil blend 20/80 in a carrier oil such as almond oil, coconut oil, or Young Living's V6 carrier oil with six organic vegetables oils, then massage into muscles before an intensive workout. Your muscles will thank you! *(pass around PanAway)*
